

## Office Sealer

Table Top

# Office Sealer

## Table Top

### Compact & Silent

The new concept with a compact and small machine makes it possible to place the "Office Sealer" in your office, this also due to the fact that the "Office Sealer" is very silent.

### Off-Line & On-Line

You can operate your "Office Sealer" either as an "Off-Line" machine, or you can connect it directly to your table-top laser printer and use it "On-Line".

This gives the opportunity to use the "Office Sealer" for qualified mail where the information shall not be displayed to anyone but the receiver. The forms are fed directly from the printer without any interruption into the Sealer. Safe and easy.

### Cost Saver

With its short pay-off time together with lower cost per mailpiece, the "Office Sealer" is the perfect solution for reducing your mail costs.

### Easy to Use

Anyone can easily learn how to operate the "Office Sealer". No special training, Plug and Play. You connect your "Office Sealer" in a minute, and directly it is ready to operate. Single fold; wrap fold; Z-fold; symmetric or asymmetric fold, anything is possible in this machine.

Sheet feeder - Folding

Easy to operate

## Technical Data

### Standard Equipment

Infeed unit
